Relevant Coursework

Summary

Product designer learning how to be a full-stack web developer. Driven by a strong desire to make well designed functioning applications. Extensive background in ideation, creation, collaboration, and currently fostering problem solving, persistence, and detail oriented skills.

Experience

LEARN Academy / Full-Stack-Web-Development Student

August 2020 - Present, San Diego

- Gaining extensive hand on experience using HTML, CSS, JS, React, Ruby, and Rails.
- Created multiple projects utilizing knowledge accumulated during this time.

Triton Mobility Services / Part-Time Student Driver

November 2018 - June 2020, San Diego

- Constantly managed time to safely deliver injured students/staff to and from their classes and other various destinations.
 - Developed strong communication skills by holding rapid short conversations with passengers.
-

Projects

Arbeide / May 2020 - June 2020, UCSD

- Created the general layout of the prototype as well as most of the overall design all through a remote setting.
- Collected data through surveys and online interviews determining how individuals stay productive during a stay-at-home order.

Munch Mates / October 2019 - December 2019, UCSD

- Performed contextual inquiries and collected data on what demographic of people tend to eat alone.
- Provided support towards teammates on our prototype and designed the logo.

Venmo Redesign / October 2019 - December 2019, UCSD

- Interviewed multiple individuals on the functionality of Venmo and gauged its efficiency.
 - Wireframes and created most of the prototype components.
-

Education

UCSD / B.S. Cognitive Science w/ Spec Design and Interaction

September 2016 - June 2020, San Diego.
